- **Chatbot Systems:** AI Chatbots, Chatbot Development, Chatbot Flow Design, Chatbot Integration
- **Business Tools & Integrations:** Shopify, Google Sheets Automation
- **Operations Support:** Virtual Assistance, Workflow Optimization, System Integration

PROFESSIONAL EXPERIENCE

Freelance Technical Virtual Assistant & Automation Specialist

January 2025 – Present

- Built an automated transaction export workflow connecting Xero to Asana (via CSV processing and Google Sheets), creating real-time tasks and eliminating manual accounting data entry for clients.

- Developed an AI Job Scraper and Resume Optimizer that searches job boards, extracts data, and auto-generates tailored resumes, helping clients submit 50+ optimized applications weekly.
- Created an AI Content Repurposing system that transcribes videos, generates blog posts, and publishes to Facebook and LinkedIn automatically, saving content creators 15+ hours per piece.
- Implemented Gmail Email Attachment Storage automation that analyzes incoming files, generates smart names, logs everything in Google Sheets, and sends instant notifications.
- Engineered an Automated Leads Enrichment workflow using Apollo that scores, routes, and notifies teams via Slack and Gmail while drafting client emails, boosting conversion follow-up speed.
- Designed a RAG-powered AI Agent with Supabase Vector Store and Google Gemini for intelligent document querying and automated responses across client files.
- Deployed a Facebook AI Chatbot with webhook integration, knowledge base filtering, and Google Gemini to deliver 24/7 accurate customer support and lead capture.
- Built a scheduled AI Video Content Creator using Google Gemini that generates scripts and auto-uploads finished videos to Facebook and YouTube channels.
- Constructed an AI Receptionist for calendar management, handling availability checks, bookings, updates, cancellations, and confirmations across email and messaging apps.
- Optimized a multi-path CRM Lead Engagement workflow in Asana and Gmail that automates personalized follow-ups, welcome sequences, and status-based actions for higher close rates.
